
No 1 in solar module exports

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

Are China's solar module exports increasing or decreasing?

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations by Solarbe indicate that while the export value is decreasing, the volume continues to rise.

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

Which countries export the most PV modules in 2024?

By the end of May 2024, the total export value for the year reached \$13.62 billion, with a cumulative export volume of approximately 97.9 GW. The Netherlands, Brazil, and Saudi Arabia were the top destinations, each receiving over 1 GW of PV modules in May. Regional Insights Europe remains the largest market for Chinese PV modules.

Most of the Solar Module exports from the World go to the United States, India, and Ukraine. Globally, the top three exporters of Solar Module are China, Vietnam, and India. . . .

China's solar module exports fell 8% YoY in Q1 2025, amid market oversupply. Africa was the only region with annual growth, rising 39% YoY during the reporting quarter ...

China's combined crystalline silicon solar module production output within the 10 months of this year rounded up to 453 GW. It ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

India's solar exports in Q1 2025 have experienced an impressive 26.1% quarter-over-quarter growth, while imports have surged ...

As global demand for renewable energy surges, the photovoltaic module export industry has become a cornerstone of international trade. This article explores key market drivers, ...

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations ...

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis.

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General ...

In 2024, the export value of solar photovoltaic modules worldwide stood at approximately **** billion U.S.

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

Indian solar module and cell exports decreased 16% year-over-year (YoY) to \$1.5 billion (~INR129.4 billion) in 2024 from \$1.8 billion ...

In 2023, China achieved record photovoltaic export volume growth across all subcomponents, driving manufacturing expansion in ...
