Does North Korea have solar energy?

In this second installment of our series on North Korea's energy sector, we will examine the evolution of solar energy in the state's energy plans and policies. Hydropower still makes up the bulk of the country's renewable energy generation, but solar has become increasingly important over the past decade.

Is solar a good idea for North Korea?

Introduction of Solar to North Korea's Energy Mix The Democratic People's Republic of Korea (DPRK or North Korea) appears to have identified the benefits of harnessing renewable energy in the mid-2000s.

Does Kim Il sung University have a solar lab?

The Kim Il Sung University Solar Lab has been profiled by state television several times. In most reports, engineers are shown assembling solar panels from solar cells and testing the panels. As with the Natural Energy Institute, it is unclear from the images if the cells are also produced at the laboratory or imported from an external source.

Did Kim Jong il visit a solar water heater factory?

A day earlier, state media reported that Kim also visited the new solar equipment center in Pyongyang, which was manufacturing solar water heaters. Figure 2. Kim Jong Il looks at solar water heaters in photographs published in the Rodong Sinmun on October 10, 2011.
