## **Northern Cyprus energy storage layout plan**

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021.

The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

Will a storage system be installed at Dhekelia Power Station?

Electricity Authority of Cyprus (EAC) Chairman George Petrou announced ongoing tender processes for installing storage systems at the Dhekelia power station, with company proposals expected by month-end. Industry representatives raised concerns about existing programs.

SunContainer Innovations - Discover how Northern Cyprus is shaping its energy future through storage project regulations. Learn about policies, market potential, and actionable insights for

...

An environmental impact assessment (EIA) has been submitted for a renewable energy project combining solar PV and energy ...

Today, energy management is of strategic importance, and evaluating options is an important step for decision-makers in energy management. The lack of strategy for the future of Northern

...

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, ...

In order to examine options for economically optimal deployment of renewable energy in Cyprus under different scenarios, and to understand the potential impact of key policy decisions on the ...
