
Outdoor AP base station installation

What are the different types of outdoor AP installation options?

There are basically four options in outdoor AP installation: wall mounting, pole mounting, corner mounting and roof mounting.

How do I install the UniFi AP AC outdoor?

The recommended mounting of the UniFi AP AC Outdoor is on a pole. Optionally, the UniFi AP may be installed on a wall using additional hardware. Perform the steps for the appropriate installation: The Mounting Bracket must be mounted directly to a wood stud or other structurally stable surface using four fasteners (not included).

How do you install an outdoor access point?

The Process of Outdoor Access Point Installation Use a marker pen to mark the location of the installation holes on the wall. Use an impact drill to drill holes in the wall according to the marked positions. Use a hammer to tap the expansion bolts vertically into the hole. Fix the bracket on the wall with four M6 screws.

Should APS be mounted on a pole?

Pole mounting is a good option when installing the APs away from the buildings, which is more common in a wireless mesh system where no cables need to be pulled to each location. It's ideal for providing a 360° overall coverage for your premises, but if the access point is mounted too close to the pole, the RF will be severely attenuated.
