## Outdoor power solar charging

Which solar charger power bank is right for You?

Adventure enthusiasts who need reliable power during extended outdoor excursions will find the BLAVOR Solar Charger Power Bank exceptionally well-suited for their requirements. This 10,000mAh unit delivers 20W fast charging through USB-C output, charging an iPhone 15 to 65% in thirty minutes.

How many Watts should a solar charger charge?

Once you get an idea of charging capacity and your intended use for a solar charger, it's time to figure out what devices you plan on using. For smaller handheld items such as smartphones, a solar power bank with five to fifteen watts should suffice.

How to choose a solar charger?

Make sure to place your panels in ideal locations to capture sunlight and avoid running out of juice sooner than expected. Features such as kickstands and legs can help create a more optimal angle for charging. Choosing the right location for your solar charger can make a big difference in charging capabilities.

Which solar panels perform well in direct solar charging?

The Goal Zero Nomad 50 performed well in direct solar charging and it has a DC output so it can charge larger power stations. We found a few smaller panels performed surprisingly well in direct solar charging speed. The Blavor 10W, FlexSolar E10 Mini, and BigBlue SolarPowa 14 generated 1,401 mAh, 1,247 mAh, and 1,178 mAh of power, respectively.
