
Panama Colon Hybrid Power Plant

What is the largest power plant in Panama?

The power generation capacity of Colon CCPP--380MW--is the largest in Panama. The plant is located in Colon, which lies near the Atlantic entrance to the Panama Canal and is about 60km north of Panama City, the capital of the country. POSCO E&C will also construct a gas terminal with a storage capacity of 180,000m^3.

How will POSCO E&C's Colon power plant work?

POSCO E&C will also construct a gas terminal with a storage capacity of 180,000m^3. Power produced from the Colon combined cycle power plant can be supplied to around 15 million households simultaneously, which will ensure a stable supply to the industrial complex near the Panama Canal and Colon area.

Where is AES colon power station?

AES Colón power station (Termoeléctrica Colón) is an operating power station of at least 381-megawatts (MW) in Isla Telfers, Colón, Panama. It is also known as Costa Norte Gas. The map below shows the exact location of the power station. Your browser is not compatible with Google Maps v3. Unit-level coordinates (WGS 84):

Which hydroelectric plant uses water from the Bayano River?

Located 80 km from Panama City, this hydroelectric plant utilizes the water from the Bayano River. It is also known as "Ascanio Villalaz," a name given in honor of the director who lead the construction of the project from 1972 to 1976 under the former Institute for Hydraulic and Electric Resources.
