
Plans to invest 150 million yuan in energy storage projects

Will China add 100 GW of new energy storage by 2027?

China aims to add more than 100 GW of new energy storage (primarily battery storage, excluding pumped hydro) by 2027, according to a new action plan presented by authorities on Friday.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Can China scale up energy storage investments?

This study explores the challenges and opportunities of China's domestic and international roles in scaling up energy storage investments. China aims to increase its share of primary energy from renewable energy sources from 16.6% in 2021 to 25% by 2030, as outlined in the nationally determined contribution .

How big is China's new energy storage fleet?

As of June 2025, China's new energy storage fleet had surpassed 100 GW, overtaking the pumped hydro additions for the first time, according to data from the China Energy Storage Alliance (CNESA). The new action plan, grounded in the nation's dual carbon goals, aims to grow the national new energy storage fleet to 180 GW by 2027.

The existing literature on energy storage has primarily focused on technological innovation, leaving a research gap to be filled using a policy lens. Through qualitative analysis, ...

China launches a 2025-2027 action plan to expand new-type energy storage to 180 GW, supporting its green energy transition goals.

The Action Plan for the Large-Scale Construction of New-Type Energy Storage (2025-2027) proposes that by 2027, China's installed capacity of new-type energy storage will ...

The country aims to achieve more than 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to drive approximately 250 billion yuan ...

According to the agreement, the project will be located in the Energy Storage Industrial Park of Xuzhou District, Yibin City. It will involve constructing industry-leading high ...

Policy China targets 180 GW of new energy storage by 2027 in ambitious national plan Announced by the National Development and Reform Commission (NDRC) and the ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

On June 25, Jingshan Light Machine announced that Suzhou Shengcheng Photovoltaic Equipment Co., Ltd. (Hereinafter referred to as "Shengcheng Photovoltaic"), a wholly-owned ...

The country aims to achieve over 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to ...

Headlines China's three-year action plan for new energy storage construction has been released, targeting an installed capacity of over 180 million kilowatts by 2027, driving direct investment of ...

The country aims to achieve over 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to drive approximately 250 billion yuan (about ...
