
Power Uninterruptible Power Supply Battery

What is an uninterruptible power supply (UPS battery backup)?

An Uninterruptible Power Supply (aka a UPS Battery Backup) protects vital connected equipment -- computers, servers, and telecommunications equipment -- from power outages. During an outage, that small UPS Battery Backup under your desk at work gives you enough time to save your spreadsheet and properly shut down your computer.

What is an uninterruptible power supply?

While computers are the focus of our post today, Uninterrupted Power Supplies can also be useful for home entertainment systems, medical equipment, and home security systems, among other things that need continuous uninterrupted power. If you're looking for an Uninterruptible Power Supply, it's important not to over- or under-spend.

How much does a replacement battery cost for an uninterruptible power supply?

The replacement battery kit can cost around \$100, depending on the size and battery capacity of your Uninterruptible Power Supply. Some Uninterruptible Power Supplies share a data connection over a USB or serial cable so that they can speak to the computer via software to let it know when to shut down.

What makes a good uninterruptible power supply?

Higher-quality Uninterruptible Power Supplies will also have built-in surge protection and voltage regulation, which both prevent power spikes from damaging connected equipment as well as adjusting voltage levels until stable so that your equipment runs as efficiently as it can without hiccups.
