# Price of solar glass greenhouse in Israel

How much does a greenhouse cost in Israel?

In Israel, greenhouse farming is becoming increasingly popular due to the country's Mediterranean climate. A greenhouse typically costs around \$60,000 to build, but this cost can change depending on the size and specifications of the structure. In addition, necessary permits and licenses may also cost money.

How does greenhouse farming work in Israel?

Today, greenhouse farming is one of Israel's most important agricultural sectors. This type of farming uses artificial light to help plants grow faster and produce more crops without the need for pesticides or other harsh chemicals. In general, the most common type of greenhouse is the tunnel system.

What are the different types of greenhouses in Israel?

Intensive greenhouses are the most prevalent type of greenhouse in Israel. These farms use various techniques to optimize production, including reflective roofs, high-intensity lighting, and ventilation systems that circulate air at high speeds. Open-air greenhouses are similar to intensive greenhouses but are designed for smaller-scale production.

Are there limitations to greenhouse farming in Israel?

Greenhouse farming has been booming in Israel recently, with many farmers adopting the practice to increase yield and decrease reliance on imports. However, some limitations to greenhouse farming in Israel must be considered. One limitation is that Israeli climates are not ideal for greenhouse cultivation.
