## Proportion of Laotian energy storage export enterprises

How much electricity does Laos export in 2024?

In 2024, electricity exports continued to lead Laos' export revenues, generating nearly USD 980 million and accounting for 15.35 percent of total exports, according to the Department of Foreign Trade. The country's total trade volume for the year reached USD 16.35 billion, with exports valued at USD 8.14 billion and imports at USD 8.21 billion.

Which countries import the most electricity in Laos?

On the import side, primary goods included diesel fuel, machinery, and vehicles, with Thailand and China remaining the largest import partners. For comparison, in 2023, electricity exports topped the list, contributing USD 2.38 billion to Laos' export revenue.

How much electricity does Laos export to ASEAN?

In 2021, Laos exported over 6,400 MW to ASEAN member countries. The figure is expected to reach 20,000 MW by 2030. However, the overreliance on hydropower also raises concerns, especially about the electricity shortage during the dry season and also concerns about environmental problems.

What are Laos' biggest exports & imports?

In the top export and import goods, electricity and diesel respectively dominated the lists, with an export of approximately \$2.4 billion in electricity and an import of around \$0.9 billion in diesel. Electricity exports have notably propelled Laos's trade surplus, accounting for 28.5% of total exports.
