What is a pure sine wave solar inverter charger?

Pure sine wave solar inverter charger is 700 watt(1000VA) power with battery charging for off grid,LCD display AC voltage,battery and loading status,converts 12V/24V DC input voltage to 110V/220V AC output.

Do pure sine wave inverters work in off-grid solar power systems?

Pure sine wave inverters work in nearly all types of off-grid solar power systems,depending on the requirements of the system. They are typically used in larger off-grid solar systems but are also suitable for smaller systems--like mobile applications.

What is pure sine wave inverter?

Pure Sine Wave Inverter is one of the most recognizable technologies that has been utilized by both industrial and private sectors in Distributed Power Generation (DG) Systems . DG Systems are normally assisted by Photovoltaic (PV) systems and fuel cells on small scale .

How long does a solar inverter last?

No battery storage system,pure sine wave AC output,wide input voltage can be set according to customers" requirement. Powerful protection functions make its service life up to 15-20 years or more. These solar inverters provide a reliable source of power in areas without access to the grid or as a backup power supply.
