# Replacing a breaker in China in Bhutan

Should I replace or upgrade my main circuit breaker?

Replacing and upgrading your main circuit breaker is a significant step towards enhancing the safety and functionality of your home's electrical system. Recognizing the signs of when to replace your breaker and understanding the process ensures that your electrical setup remains reliable and efficient.

What should I do if I need a new circuit breaker?

Replacement main circuit breaker - Smart breaker (if upgrading) 1. Safety First: - Turn off all appliances and devices connected to your electrical system. - Wear insulated gloves and goggles to protect yourself from electrical hazards. 2. Shut Off the Power: - Locate the main circuit breaker panel and shut off the main power supply.

How do you remove a circuit breaker panel?

Locate the main circuit breaker panel and shut off the main power supply. - Use the voltage tester to ensure there is no electrical current flowing through the panel before proceeding.

Remove the Panel Cover: - Use a screwdriver to remove the screws securing the breaker panel cover. Carefully lift off the cover to expose the breakers. 4.

How do I choose the right breaker for my home?

Selecting the appropriate main circuit breaker involves several key considerations: 1.

Amperage Rating: Ensure that the new breaker matches or is compatible with your home's electrical load requirements. Common ratings include 63A, 80A, and 100A. 2. Type and Model: Match the replacement breaker to the type and model of your existing breaker box.
