## Rooftop solar Panel Companies

What is a rooftop solar system?

A rooftop solar system is an array of solar panels installed on a roof, each containing several solar cells that absorb sunlight and create an electric field across each panel. Roof-mounted solar systems are more discreet than solar setups installed at ground-level because they are hidden from view, and they save space on the property.

Are rooftop solar systems high maintenance?

No, rooftop solar systems are not high maintenance because they only need to be cleaned twice a year. Most debris on roof-mounted solar panels slides off naturally or is washed off by rainfall. Is it worth it to install Rooftop Solar PV Systems?

Are rooftop solar systems a good investment?

Rooftop solar systems entitle owners to many financial benefits, like saving money on electricity bills, increasing the value of the property, and receiving tax credits. Rooftop solar systems enable property owners to be partially or fully 'energy independent,' switch to renewable energy, and reduce carbon emissions.

What are the different types of rooftop solar PV systems?

The three main types of rooftop solar PV systems are off-grid rooftop solar systems, on-grid rooftop solar systems and hybrid solar systems (grid-tied with battery). Off-grid rooftop solar systems include a solar battery to store excess energy, so owners have backup power during periods of low sun.

Shanghai Chiko Solar Technology Co., Ltd CHIKO Solar designs and manufactures high quality solar mounting systems for pitched roof, flat ...
