
San Diego Solar System

How much solar energy does San Diego have?

San Diego alone has 303 megawatts of that capacity, making it the No. 1 city in the nation for solar energy. That's enough energy to power almost 76,000 homes throughout this beautiful city, and the numbers continue to grow.

Does San Diego have solar panels?

The intense California sun is a boon to those with solar panels, as that bright sunshine spells more affordable power. San Diego currently has more solar rooftops than any other city in California, and with an average of 266 days of sunshine per year, that translates into a great deal of power collected by those panels.

Where can I find solar installers in San Diego?

So, if you're searching for solar installers in San Diego, Axia Solar is here to help you electrify your life. When it comes to solar panels and installation in this country, Californians lead the charge. Thanks to local and state initiatives toward green energy and sustainability, the state has over 38,000 megawatts of installed energy capacity.

Is San Diego a solar city?

Environment California's report has ranked San Diego as one of the top solar cities in the country for three consecutive reports and that's very encouraging." Researchers with the Environment California Research & Policy Center said San Diego now has enough solar energy to power 47,000 homes.
