
San Jose Solar Gigawatt Power

What is PGEC's San Jose solar project?

The San Jose Solar project is the latest in PGEC's portfolio of renewable energy investments, pushing forward its clean energy commitment in Luzon. Follow Power Philippines on Facebook and LinkedIn for more updates on project milestones and clean energy developments.

Should San Jose buy more power?

In San Jose, city energy officials say they are reluctant to procure additional power until they know which projects will actually be built. "We do not want to buy more power than we need," said panelist Lori Mitchell, director of San Jose Clean Energy, the city's publicly-owned electricity provider. "That's job No. 1."

Could AI triple San Jose's energy use?

Data centers for AI could nearly triple San Jose's energy use. Who foots the bill? - Los Angeles Times Data centers for AI could nearly triple San Jose's energy use. Who foots the bill?

Could a data center triple San Jose's energy use?

Data centers for AI could nearly triple San Jose's energy use. Who foots the bill? The county seat of Santa Clara is touting its partnership with Pacific Gas & Electric, claiming the city is "the West Coast's premier destination for data center development."

AI's planned data-center boom is straining California's grid forecasts and raising fears that customers could pay for upgrades if projects never materialize.

"The solar plants will be exposed to power prices and, obviously, that brings in a lot of risk for these plants," says Lara Hayim, solar analyst at BloombergNEF.
