# Sierra Leone uninterruptible power supply specifications and models

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are backup batteries that provide emergency power to electrical systems in case power becomes unavailable. They are connected between a power source (such as an electrical outlet) and the equipment to protect (such as a motor or computer).

What is a single-phase uninterruptible power supply (UPS)?

Single-phase uninterruptible power supplies (UPS) sit between an AC outlet and an electronic device to provide power conditioning, back-up protection, and distribution for electronic equipment loads. They also prevent power disturbances from affecting the performance and life of the electronic device and vital data.

What is an industrial network uninterruptible power supply (UPS)?

ETI Industrial Network Uninterruptible Power Supply (UPS) SPECIFICATIONSThe Uninterruptible Power Supply (UPS) shall be powered by 24VDC (nominal) input and provide 24VDC (nominal) output at 100 Watts (max.) for a duration of 1.0 minutes, typ. Ultracapacitors shall be employed for energy st

What is a DC uninterruptible power supplier?

DC uninterruptible power suppliers are designed specifically for DC systems. This type of UPS provides continuous back-up for telecommunication, telephone, and other systems that use DC power. All products with ANY of the selected attributes will be returned as matches.
