## Solar Inverter 72V

What is the difference between a 12V and 72v inverter?

The 12V inverter is only suitable for 12V batteries. The 72V inverter is only suitable for 72V batteries. - Before connecting the inverter, make sure that the inverter switch is turned off! - When using the inverter, please tighten the positive (+) and negative (-) terminals, otherwise the loose connections will become hot due to poor contact.

What is a car inverter converter?

?Anti-interference Pure Sine Wave Inverter?The car inverter converter adopts pure sine wave technology, which has low interference, low noise and large load capacity, it is a voltage converter that converts 12V /24V /48V /60V /72V DC into 110V/120V/220V/230V/240V AC. It can be used in emergencies, camping, cars, homes, RVs and solar energy.

Do I need to select the output voltage for my inverter?

A2: The output voltage is the US standard voltage 110V~120V (default). You do not need to select the output voltage, only select the input voltage. Of course, if you need an inverter with an output voltage of 220V, please let us know by email.
