What is a solar inverter error code?

Many solar inverters display fault codes or solar inverter error codes to help identify the cause. These codes are useful when diagnosing the problem or resetting the inverter. Solar panels produce electricity as direct current (DC), but homes use alternating current (AC). The inverter converts DC to AC so your appliances can use the power.

What does error code E01 mean on a solar inverter?

Often, with a bit of troubleshooting knowledge, home and property owners can resolve these issues without needing extensive professional intervention, thus keeping their solar energy systems operating efficiently. Error code E01 is frequently encountered and typically signifies an overvoltage condition within your solar inverter system.
