# Solar inverter integrated recommendation

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Which solar inverter should I Choose?

The solar inverter you choose will need to be compatible with the solar system type you are installing: Grid-tied inverters are meant for grid-tied solar systems, the most common system type. They manage a two-way relationship with the grid, exporting solar power to it, and importing utility power from it as required.

Can a solar inverter be integrated with a battery storage system?

Yes, solar inverters can be integrated with battery storage systems. This combination allows you to store excess solar energy for use throughout the night or during utility power outages.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Your solar inverter is just as important as the solar panels you choose. We compared dozens of inverters to determine the best technology.
