## Solar module export demand

How much did module exports increase in 2024?

Module exports increased by more than 30% year-on-year, indicating strong overseas demand. According to Gaixi Consulting, the cumulative export of modules in January and February 2024 was 36.95 GW, a year-on-year increase of 33.8% and a month-on-month increase of 20.8%.

How many dumping and import taxes are imposed on solar PV?

Since 2011, the number of antidumping, countervailing and import duties levied against parts of the solar PV supply chain has increased from just 1 import tax to 16 duties and import taxes, with 8 additional policies under consideration. Altogether, these measures cover 15% of global demand outside of China.

How has China shaped the global supply and demand of solar PV?

Government policies in China have shaped the global supply, demand and price of solar PV over the last decade. Chinese industrial policies focusing on solar PV as a strategic sector and on growing domestic demand have enabled economies of scale and supported continuous innovation throughout the supply chain.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Vietnam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.
