## Solar panel villa

Does a solar power system add value to your home?

Lawrie says adding solar power infrastructure can boost your home value in more ways than one. Not only does it add to the list of features that appeal to buyers, but tenants are also likely to appreciate the savings potential - especially if the system includes a battery. Stadium Real Estate's Rachel Lawrie.

How much does a solar system cost?

Gardiner says small solar-only systems tend to have a starting price of about \$4000 while small solar and battery systems start from about \$8000-\$10,000. "For a solar-only system, you really could get a payback period of anywhere between 18 months to two years," Gardiner says.

Can solar panels save you money?

Installing solar panels could save you up to 80 percent on your home energy bills, but experts warn you can also risk losing thousands and thousands. With electricity bills skyrocketing over the past couple of years, more and more people are looking to the sun to power their homes, businesses and EVs.

How much does a solar inverter cost?

Prices vary depending on the type of inverter you install, whether you get a battery and where the equipment has been manufactured as well as the size of the system you require. Gardiner says small solar-only systems tend to have a starting price of about \$4000 while small solar and battery systems start from about \$8000-\$10,000.
