
Solar panels installed on rooftops in Georgia

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

Is Georgia a good place to install solar panels?

Georgia is a good place for solar installations, with 217 sunny days a year and high power bills. The dropping prices of solar panels and decreasing installation costs and time have led to an increase in the number of Georgians opting for residential solar installations. The solar industry in Georgia is growing.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Does Georgia offer net metering?

Georgia doesn't offer net metering, but some utility companies (including Georgia Power) offer a solar buyback program known as net billing. Under net billing, you'll earn some cash credit toward your energy bill when you send excess electricity from your solar panels to the grid--but it's a lot less than what you actually pay for electricity.
