## **Solar power storage extended warranty**

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty.

How long does a solar panel warranty last?

The length of a product warranty varies based on the manufacturer and model.

Traditionally, these warranties typically last 10-15 years, although it is becoming more common for premium panels to have 20 and 25 year product warranties. If a panel fails within the warranty period, the manufacturer will typically replace or refund the panel.

Do solar panels have a performance warranty?

Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years. It's important to note that the performance warranty guarantees the panel's ability to produce a certain amount of electricity - not that the panel will produce that amount.

The extended warranty period and price depend on the storage/operating conditions. The Buyer may consult Huawei local service team for more details. In principle, the entire warranty period ...
