# Solar powered house generator in New-Zealand

What is a solar power generator?

A solar generator, also known as a portable power station, stores energy from sunlight or the grid for emergency home backup power or off-grid activities, such as camping. How do solar generators work?

Why do you need a generator in New Zealand?

When it comes to ensuring that you have a reliable source of power, especially in times of emergencies or when off the grid, having a quality generator can be a game-changer. In New Zealand, where power outages due to weather events or other reasons can occur, having the best generator is essential for peace of mind.

Which solar power systems are most commonly installed in New Zealand?

This comprehensive guide aims to demystify the key solar power systems commonly installed in New Zealand - off-grid, grid-tie, and hybrid/grid-tie with energy storage (ESS) - the energy storage system is almost always battery.

What are the different types of solar systems in New Zealand?

Off-grid systems typically require a larger array of solar panels, higher capacity battery storage and a back-up generator to ensure a continuous, reliable power supply. Grid-Tie Systems - Grid-tie solar systems, which are connected to the public electricity grid, are the most common solar installation in New Zealand.
