
St George solar Water Pump

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks--without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

How to install a solar-powered water pump?

Installing a solar-powered water pump can be a hassle-free experience if you consider a few key factors. Many pumps come with a plug-and-play design, letting you set them up quickly without complicated electrical work. Pay attention to the cable length, as longer cables offer flexibility for positioning the solar panel and pump effectively.
