
Stairwell Solar System

What is Solar Walk?

Solar Walk is a stunning model of the Solar system that shows you the planets, satellites, and other space objects with incredible detail and accuracy. You can navigate through space and time, see all the planets in close-up, learn their trajectories, composition, surface temperature, history of their exploration, points of interest, and more.

How to choose a solar step light?

Choose the level of brightness that suits your specific safety and aesthetic requirements. Color Temperature: Solar step lights are available in various color temperatures, ranging from warm white (3000K) to cool white (6000K). The choice between warm or cool lighting depends on the ambiance you want to create.

What are surface-mounted solar step lights?

Surface-mounted solar step lights are installed directly on the step surface. These lights are available in various shapes, including square, round, and rectangular, and can add a touch of modernity or classic charm to your outdoor steps, depending on the chosen design. They are typically easy to install and offer versatility in terms of placement.

How do solar step lights work?

Solar step lights are ingeniously designed to harness the power of the sun and convert it into light, illuminating your outdoor steps and pathways in an eco-friendly and cost-effective manner. This section will take you through the fascinating process of how these lights work, shedding light on their key components and inner workings. 1.
