## Swiss solar panel purchase costs

How much does a solar system cost in Switzerland?

A normal solar power system for an average single-family home in Switzerland costs around CHF 15,000 after subsidies and tax savings. The higher the self-consumption and the proportion of solar energy produced in the total energy requirements, the faster the solar system pays for itself.

How much does a solar panel cost in Europe?

Referring to the general price in Europe, a solar panel is 200-400 Euros, and a microinverter is 100 Euros. If you buy two panels, you can realize your solar energy investment plan for less than 1,000 Euros. How to install?

How much do solar panels cost in Germany?

According to Lang (2016), the feed-in tariffs for roof mounted solar panels, with a rated capacity between 10- and 40 kWh, in Germany is 0,1225 EUR per kWh. This would give a yearly income of:

Should you invest in a solar system?

The investment costs can also be deducted from taxes in most cantons. Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases.
