
TCL Technology has large energy storage

Who is TCL photovoltaic technology?

TCL Photovoltaic Technology is a green energy full-lifecycle smart service provider that offers one-stop solutions integrating development, manufacturing, and energy management. Founded in 1981, TCL has grown into a globally competitive intelligent technology industry group over its 42-year development history.

How much storage does the TCL 10L have?

Don't expect a lot of storage from the TCL 10L, which ships with 64GB of capacity. A microSD slot lets you add another 256GB to the phone. The Moto G Stylus doubles the on-board storage of TCL's phone, though. The TCL 10L isn't the longest-lasting phone in TCL's new lineup, but it's not far off the pace set by the TCL 10 Pro.

Does TCL support data structures?

So theoretically, Tcl does support data structures, although doing so with lists only can be very cumbersome. Tcl associative arrays are good for C struct or Pascal record type things. Except, of course, in Tcl they're not declared ahead of time, so there's no way to know in advance what keys exist in the array.

Is TCL a Fortune 500 company?

Founded in 1981, TCL has grown into a globally competitive intelligent technology industry group over its 42-year development history. Its revenue in 2022 was CNY 260 billion, an increase of approximately 4% year on year. Its subsidiaries TCL Industrial and TCL Technology are among the Fortune China 500.
