# Tariffs on imported solar container lithium battery packs from South America

What is the US tariff policy on lithium ion batteries?

In April 2025, the U.S. government updated its tariff policy on lithium-ion batteries imported from China. The current tariff structure includes: A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026.

How will US tariffs affect Chinese lithium batteries in 2025?

U.S. tariffs on Chinese lithium batteries have become a critical factor shaping the global battery market in 2025. These tariffs directly impact lithium-ion batteries' cost, supply chain, and competitiveness, essential for electric vehicles (EVs), renewable energy storage, and consumer electronics.

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

How much will China impose on lithium-ion batteries in 2026?

A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026. Additional tariffs imposed under recent trade actions push the total tariff on Chinese lithium batteries to approximately 82% by 2026.

With the US being a major market for Chinese solar and EV products, especially lithium-ion batteries, the increased tariffs will raise ...

The U.S. has imported around \$4 billion worth of lithium-ion batteries from China during the first four months of 2024. If the 60% to 100% tariffs become a reality, they would ...

Discover how solar EPCs and developers can survive 2025 tariffs, UFLPA detentions, and battery shipping chaos. Learn smart logistics strategies to cut costs, stage ...

With the US being a major market for Chinese solar and EV products, especially lithium-ion batteries, the increased tariffs will raise the cost of Chinese products, weakening ...

Discover how the U.S. Executive Order of July 31, 2025, adjusting reciprocal tariffs effective August 7, affects lithium-ion and polymer battery raw material costs, and explore ...

The recent increase in U.S. tariffs on Chinese-made lithium-ion batteries is poised to significantly affect small businesses in the battery sector. Effective January 1, 2026, Section ...

The study highlights the sensitivity of BESS deployment to both tariff levels and technological

---

learning rates, with higher tariffs ...

As of March 22, 2025, BESS manufactured in China and shipped to the U.S. faces a tariff rate that's already a bit of a gut punch. Under the Biden administration's Section 301 adjustments, ...

This briefing focuses on the tariffs affecting battery energy storage. Policy changes affecting the solar portion of the Section 301 tariffs are addressed in a separate briefing. ...

US lithium battery import tariff increase: A new energy game that affects the world On 10 April 2025, United States President Donald Trump announced via social media his ...

The Trump administration's China tariffs have piled atop existing and developing trade barriers on battery energy storage systems, ...

U.S. tariffs on Chinese lithium batteries in 2025 impact costs, supply chains, and EV, energy storage, and electronics industries globally.

The tariff changes have had a major impact on battery energy storage pricing, since a large share of solar-related battery systems ...

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and ...
