# Trading Terms for Low-Pressure Folding Containers

How do shipping companies deal with trade volume differences?

trade volume differences. Traditionally, shipping companies address this by transferring containers between ports using spare ship capacity. However, this does not generate revenue and incurs container management costs (CMCs). Some container carriers may use foldable containers (FLDs), such as four-relocating empty containers.

What is a foldable container?

It is, therefore, suitable for use by shipping lines and terminals. Foldable containers save up to 75% space and costs (50-60%). One standard container takes up as much space as four foldable ones. In addition, they are more environmentally friendly. The transport of foldable containers generates 37% less carbon dioxide.

What is a flat rack container?
