# Uninterruptible power supply dual power automatic conversion

What is an uninterrupted power supply (UPS)?

An Uninterruptible Power Supply (UPS) helps prevent these issues. Among the different UPS types, the Double Conversion UPS is known for its reliability in providing clean and stable power. This article will explain what a Double Conversion UPS is and how it works to safeguard your important systems.

What is a double conversion UPS?

This is the highest level of power protection available. The power provided by these systems is cleaner than the power coming from the power grid or an unprotected wall receptacle. All Battery Backup Power, Inc. double conversion UPS systems are pure/true sine wave output for compatibility with even the most sensitive electronics.

Does a double conversion UPS have a battery backup system?

In addition to the double conversion process, a Double Conversion UPS also includes a battery backup system. When the utility power is available, the batteries are kept charged and ready for use.

What is a pure sine wave battery backup uninterrupted power supply system (UPS)?

Online (double conversion) pure sine wave battery backup uninterrupted power supply systems (UPS) also known as active battery backup uninterrupted power supply systems (UPS) always have backup power engaged.

Online, double-conversion Uninterruptible Power Supply (UPS) actively converts raw incoming AC power to DC, then re-converts output back to completely regulated, filtered ...
