
Uninterruptible power supply equipment for South African homes

What is a "uninterruptible power supply" in South Africa?

The Uninterruptible Power Supply (UPS) has quickly become part-and-parcel of life in South Africa. Since the first announcement of 'load shedding' in 2008, UPS systems have been adopted into many households. The devices protect valuable electronics from electrical surge/outage damage and have saved families from countless headaches.

What are the different types of uninterrupted power supply (UPS) products?

LEGRAND offers a range of Uninterruptible Power Supply (UPS) products that are divided into 2 different types of products: single-phase and three-phase. The range is wide and complete, with solutions that guarantee maximum performance in terms of power and backup time.

What are the different types of ups in South Africa?

Our guide to different UPS types helps South African homeowners choose between offline, line-interactive, & online UPS systems for reliable backup power.

Why should a Home Office have an uninterrupted power supply?

Having an uninterrupted power supply will protect your home office from power surges and more. Some of the most common household appliances should not be plugged into a UPS system. This is because their average draw is very high and can put strain on the UPS potentially damaging it.
