Is Uruguay a good country for energy?

Uruguay may not dominate global energy headlines, but its transformation is among the most impressive in the world. In just 15 years, the country went from blackouts and fossil fuel dependency to over 98% renewable electricity, saving over \$200 million annually in fossil fuel imports.

How did public-private alignment work in Uruguay?

Strong Public-Private Alignment Uruguay's national utility (UTE) actively supported the transition. The government introduced reverse auctions and power purchase agreements (PPAs) to attract private developers. Over 90% of new energy capacity came from the private sector.

Why did Uruguay choose to trust local and regional investors?

Uruguay chose to trust local and regional investors, even after the IMF and World Bank declined to support early projects. This agility enabled faster project deployment and stronger local accountability. At EcoSync, we see Uruguay's story as proof of a bigger truth:
