# Vatican builds energy storage power station

Is Vatican City powered by solar?

This is not just about rooftop panels; it's about how science, sustainability, and faith can coexist and set the pace for the rest of the world to follow. Vatican City is powered by solar. On May 29, 2025, the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape.

Why does the Vatican have a solar system?

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant to supply the Vatican with energy from Santa Maria di Galeria. On the same site, the new solar infrastructure now stands.

Why did Acea install a solar energy system in Vatican City?

This project was carried out by ACEA, an Italian utility company, which installed systems to meet all of the Vatican's energy demands. What makes this significant is not the size, but that Vatican City is only 0.49 km<sup>2</sup>, and there was no loud campaign, no press tour, just action set in stone and implemented.

Will a Vatican solar project be built outside Rome?

In an apostolic letter, the pontiff said the project will be constructed on Vatican-owned property outside of Rome that spans 424 hectares, adding capacity to existing solar panel installations in the city state.

The Vatican and the Italian government sign an agreement to build an agrovoltaic plant in Santa Maria di Galeria and move towards net zero.

An aerial drone photo taken on Sept. 10, 2024 shows photovoltaic power facilities in Dengkou County, Bayannur City, north China's Inner Mongolia Autonomous Region. ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City ...

The solar power plant is intended not only to power these antennas, but also "to ensure the entire energy subsistence of the Vatican ...

Vatican City is set to become the eighth country in the world to generate 100 per cent of its electricity from renewable energy after Pope Francis announced plans to build a solar plant.

Vatican City to become 100% solar-powered, joining a select group of green energy leaders. Pope Francis emphasizes the ethical and social imperative of combating climate change.

About BYD Energy Storage Power Station in Vatican video introduction Our energy storage solutions encompass a wide range of applications from residential battery backup systems to

...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for ...

Italy clears Vatican plan for a 430-hectare solar farm at Santa Maria Galeria, putting the micro-state on course to become the world's first carbon-neutral nation.

Why the Vatican's Energy Transition Matters (Even If It's Tiny) a country smaller than New York's Central Park is building a solar farm that could power its entire population. ...

An aerial drone photo taken on Sept. 10, 2024 shows photovoltaic power facilities in Dengkou County, Bayannur City, north China's Inner Mongolia ...
