# Vietnam Communications 5G Base Station Density

How many 5G stations are there in 2025?

According to the Ministry of Science and Technology ,as of early May 2025, network operators have installed 11,591 5G base transceiver stations (BTS), equivalent to 7.72% of 4G stations. About 26% of the population has access to 5G services. According to the plan, the number of 5G stations will gradually increase in the last months of 2025.

How will 5G impact Vietnam's Digital Economy?

A study by Ericsson estimated that 5G will account for approximately 50% of mobile subscriptions in Vietnam by 2029. Currently, more than 25% of the country's data traffic is transmitted via 5G. This technology is seen as a crucial tool for Vietnam to achieve its goals in the digital economy, with a projected contribution of 20% to GDP by 2025.

Which GHz band is used for 5G in Vietnam?

The 3.5 GHz band (n77/78), which is globally harmonised for 5G, has been the basis for the pioneer phase of 5G rollouts in many markets. To date, 3.5 GHz accounts for most 5G network launches globally, 15 driving the wider ecosystem, 16 device

How many 5G BTS stations are there?

Up to now, the whole country has only 11,591 5G BTS stations; 26% of the population has access to 5G services. Network operators plan to speed up the installation of 5G BTS. Photo: VNPT

Vietnam's operators deploy 11,000 5G base stations, with plans to double by 2025 as the country accelerates toward nationwide 5G coverage.

However, due to the high-frequency bands used for 5G in Vietnam, coverage areas per base station are smaller, requiring telecom providers to deploy more base stations ...

Vietnamese telecommunications operators are ramping up efforts to build infrastructure, increase user uptake, and commercialise wide-scale 5G services across the ...

The 4G network currently covers 99.8% of the population, and the density of 5G stations is expected to increase significantly, from ...

H&#192; NOI -- Vietnamese telecom service operators are accelerating the development of 5G infrastructure, part of the effort to achieve the goal of nationwide 5G ...

The 4G network currently covers 99.8% of the population, and the density of 5G stations is expected to increase significantly, from 7.72% to 57.5% 4G station density by the ...

Vietnam targets 68,457 5G base stations by 2025, covering 90% of the population and enabling nationwide digital transformation.

---

THE HANOI TIMES -- The Ministry of Science and Technology plans to extend 5G coverage to 90% of the population by the ...

The Ministry of Information and Communications targets to raise 5G coverage rate to 99 percent of Vietnamese population by 2025 The country's three leading telecom ...

THE HANOI TIMES -- The Ministry of Science and Technology plans to extend 5G coverage to 90% of the population by the end of 2025 from current 26%. Vietnam expects to ...

The Ministry of Information and Communications targets to raise 5G coverage rate to 99 percent of Vietnamese population by 2025 ...

H&#192; NOI -- Vietnamese telecom service operators are accelerating the development of 5G infrastructure, part of the effort to ...

Vietnam's operators deploy 11,000 5G base stations, with plans to double by 2025 as the country accelerates toward nationwide 5G ...

However, due to the high-frequency bands used for 5G in Vietnam, coverage areas per base station are ...
