## Vietnam Energy Storage solar

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock)

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Sunita Dubey and Hyunjung Lee share how Vietnam is leveraging Battery Energy Storage Systems to stabilize their grid and ...

The battery energy storage systems (BESS) could be a step in the right direction among the current solutions. EVN technicians carry ...

Vietnam sharpened its national energy storage roadmap this week as government leaders and industrial operators aligned on BESS deployment.

We analyze the business implications of Decision 988/QĐ-BCT, which revises Vietnam's feed-in tariff (FiT) rates for solar power projects.

These factors create favorable conditions for the initiation and scaling of Vietnam's domestic electrochemical energy storage market. Against this background, this article ...

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing ...

---

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean ...

Analysis of Vietnam's new power development plan using our open access TZ-APG energy system models. How will renewables, ...

AHK Vietnam and GIZ are proud to support Solar & Storage Live Vietnam 2025 as official Association Partners. This two-day event ...

Vietnam's solar power industry has experienced rapid growth in recent years, driven by favourable government policies and increasing ...

The " Solar & Storage Live Vietnam " is a prominent international fair taking place at SKY Expo Vietnam in Ho Chi Minh City. It focuses on Solar-PV ...

Vietnam's energy transition is entering an accelerated phase, with the solar, energy storage, and EV charging sectors poised for explosive growth in 2025-2026.
