Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FiT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How much solar power does Vietnam have?

This included 16 billion kWh from solar power and 7.3 billion kWh from wind energy, according to data from Vietnam Electricity. Solar power, in particular, has seen significant expansion due to the implementation of feed-in tariffs and the increasing adoption of rooftop solar systems.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FiT rates. Previously, Vietnam's FiTs were relatively low.

Is solar energy growing in Vietnam?

His work has been featured by leading environmental organizations, such as World Resources Institute and Hitachi ABB Power Grids. Solar energy in Vietnam is rapidly increasing and is poised to continue its growth as part of the country's updated Power Development Plan.
