# Warranty for Single-Phase Solar Container Products Used on Construction Sites

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

What is a solar contractor warranty?

Solar contractor warranties are essential to your solar energy system's overall protection. These warranties, provided by the installer, generally cover workmanship and installation issues. They ensure the solar panels are correctly installed, and the system operates as intended. The duration of contractor warranties can vary.

Do solar panels have a warranty?

Manufacturer warranties are pivotal in securing homeowners' solar investments by providing warranty coverage for essential components. Understanding the details of these warranties is crucial for informed decision-making. Solar panel manufacturers guarantee their products are free from material and workmanship flaws.

What is a solar warranty & how does it work?

When you install solar, your warranty won't take the form of a single policy, but rather several different coverages offered by your installer and the manufacturers of your solar equipment. Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1.
