
Waterproof photovoltaic containers for Somali ports and wharves

Should rainwater collection tanks be installed on rooftops in Somalia?

The assessment calls for the installation of 261,000 rainwater collection tanks to be mounted on rooftops. That would benefit 1.5 million people--or roughly one in 10 Somalis. It also recommends digging 300 boreholes and outfitting them with solar-powered pumps, allowing 25,000 rural households to tap into underground water supplies.

Could automated weather stations help prevent flash floods in Somalia?

Finally, the report suggested Somalia build out a network of 200 automated weather stations, which could help warn residents of impending flash floods. Experts say drip irrigation, which uses small tubes to deliver water directly into the roots of plants, could improve yields across 1,500 square kilometres of farmland.

Could technology be a lifeline for millions in Somalia?

At its core is the idea that technology could be a lifeline for millions across Somalia, where climate change is deepening poverty, worsening hunger and threatening to enflame a decades-long conflict. "Climate change is a major threat," says Hafsa Omar Abdilahi, who heads the climate change unit within the country's environment ministry.

What can Somalia do about flash floods?

Drip irrigation, which uses small tubes to deliver water directly into the roots of plants, conserving supplies, could improve yields across 1,500 square kilometres of farmland. Finally, the report suggested Somalia build out a network of 200 automated weather stations, which could help warn residents of impending flash floods.

Somalia gov body MoEWR has issued a tender for the provision of solar and storage technology at 46 different sites in the country.

The assessment calls for the installation of 261,000 rainwater collection tanks to be mounted on rooftops. That would benefit 1.5 million ...

Somalia deployed 51 MW of solar by the end of 2023, up from 47 MW in 2022, according to the International Renewable Energy ...

Somalia deployed 51 MW of solar by the end of 2023, up from 47 MW in 2022, according to the International Renewable Energy Agency. In November 2024, a tender was ...
