
What is the DC current data of the Sunshine 50k inverter

What are the uses of the Sunshine range of inverters?

Numerous uses for off grid installations large and small, whether it be in the home, outbuildings, caravan, motorhome, car, truck or boat the Sunshine range of inverters give you a 230V power supply wherever you need it.

How long does it take a PV inverter to close?

The inverter will close the LCD and all LED within two minutes. The Anti-PID module repairs the PID effect of the PV module at night. The PID module always runs when connected to AC. If maintenance is required and turn off the AC switch can disable the Anti-PID function.

How do I choose the right inverter location?

Exposure to direct sunlight will increase the operational temperature of the inverter and may cause output power limiting. It is recommended that inverter installed to avoid direct sunlight or raining. To avoid overheating ambient air temperature must be considered when choosing the inverter installation location.
