
Wholesale Lv switchgear panel in Portugal

What is main LV distribution switchgear?

Our Main LV. Distribution Switchgear utilises the same flexible design principles as incorporated within our sub-distribution board assemblies ensuring an equally adaptable system. Specialised interface busbars for the extension of existing Switchgear. Front and rear access formats available for operation and maintenance.

What is the difference between LV and MV panels?

LV panels handle voltages up to 1000V AC, while MV panels manage voltages from 1kV to 36kV AC, catering to diverse industrial and infrastructure needs. JV Power Technologies' panels adhere to international standards, emphasizing safety and performance.

What is ABB Low Voltage Products?

ABB's Low Voltage Products offering encompasses a wide range of electrical products designed to ensure the safe and efficient distribution and management of electrical power in various applications. These offerings are designed to enhance safety, reliability, and efficiency in electrical systems across different industries.

What is a switchgear interface busbar?

Specialised interface busbars for the extension of existing Switchgear. Front and rear access formats available for operation and maintenance. All distribution types may be configured for top and/or bottom entry & exit cabling.
