## XD Group GE Energy Storage Container

How many MWh of energy storage does GE have?

To date GE has more than 207 MWh of energy storage in operation or in construction globally. This project will relieve pressure on the host country's energy system and provide flexibility when it is most needed to deliver a more balanced, secure energy system and help reduce consumer energy cost.

What is GE reservoir?

GE's Reservoir is a flexible, compact energy storage solution for AC or DC coupled systems. The Reservoir solution combines GE's advanced technologies and expertise in plant controls, power electronics, battery management systems and electrical balance of plant - all backed by GE's performance guarantees.

What technology does GE use for battery storage?

Built with enhanced technology including integral ground fault detector/interrupter low voltage, zero voltage and high voltage ride through capability (LVRT, ZVRT, HVRT). GE utilizes proven Li-Ion technology for battery storage solutions; each solution is tailored based on the customer's application.

Why should you choose GE reservoir?

Using advanced system planning and optimization tools, GE will deliver a tailored solution to meet the desired objectives. GE's Reservoir is a flexible, compact energy storage solution for AC or DC coupled systems.

What is XD high voltage apparatus? Developed by Xi'an XD High Voltage Apparatus Co., Ltd., a subsidiary of China XD Group, it was the group's first system solution and core product into ...
